Whitepaper · October 2026

Eduface

The business outcomes of AI marking and feedback

What 20+ implementations taught us about consistency and operational efficiency, and what your colleagues asked us at the webinar.

Consistency pages 2 to 4

9/20 essays ranked both best and worst by experienced examiners

0 AI grades shown, while every paper is still checked

Efficiency pages 5 to 6

−85% time spent typing feedback, up to 20 minutes per assignment

97% of lecturers still add their own word to the AI draft

W Webinar attendee

Should we have started this conversation by defining consistency?

E Eduface · see page 2

W Webinar attendee

Is it better and more accurate than Excel?

E Eduface · see page 4

Consistency · 3 of 3

Eduface

Every paper read. No AI grade shown.

Placeholder. The check compares the mark with the paper, so moderation looks at 3 flags instead of a random 10.

Submission	Your mark	AI grade	Consistency signal
#1042	65	Hidden	–
#1043	58	Hidden	–
#1044	72	Hidden	–
#1045	41	Hidden	▲ Outside expected range
#1046	67	Hidden	–

Illustrative screen, fictional data.

Excel

Compares marks with marks.

Consistency check

Compares the mark with the paper.
